Technology professional pursuing AWS certification in Data Engineering, with Database Administration experience and a proven capability in multiple scripting languages, including JavaScript, Python, Perl, and Bash. Trained in cloud computing platforms such as AWS, Azure, and Google Cloud, with a strong command of Transact-SQL and SSRS report writing. An experienced Sybase Database Administrator with comprehensive knowledge of Microsoft SQL Server, MySQL, PostgreSQL, Redshift, and MongoDB. Experienced in utilizing AWS Glue and Amazon Athena for data management. Recognized for thriving in Agile environments while effectively leading diverse teams and driving strategic initiatives that enhance operational efficiency and project success.

Accomplishments

- Improved team velocity by efficiently completing jira stories with accuracy and efficiency.
- Supervised team of 8 staff members.
- Secured production environment by creating automation for version control, disaster and recovery, and error notification.
- Effectively collaborated with team members to build systems, problem solve, and enhance functionality.

Highlights

- Analytical problem-solving
- Strategic decision-making
- Effective client communication
- Adaptable work hours
- Onboarding process coordination
- IT technical support
- Database administration

- Collaborative teamwork across functions
- Service excellence

EXPR

LEAD ADMINISTRATOR

WIPRO TECHNOLOGIES, South Haven MN

- Responsible for supporting both MS SQL Server and Sybase masking database environments.
- Responsible for masking data of Aurora, MYSQL, MS SQL Server, and Sybase databases.
- Setup Profiling, and Masking jobs in Delphix application to complete masking process.
- Created scripts to modify databases schemas to ensure masking process would run optimally on multiple platforms.
- Created scripts to restore masked databases to original state for application testing on multiple platforms.
- Worked with Jira scrum master to develop epics and stories that streamlined and tracked the workflow.
- Networked with industry professionals to exchange best practice knowledge and stay abreast of latest developments
- Gather and report governance data for managed services group
- Participate in resourcing process to bring on new hires
- Single point of contact and liaison for offshore production support team and Sybase engineers
- Developed automation to maintain database integrity and reduce manual intervention.
- Enhanced team productivity by providing leadership, training, and support to junior administrators.
- Worked with DDI Remediation team to establish requirements for masking of production and non-production data.

IT DATABASE CONSULTANT ENTERPRISE INFORMATION SECURITY

UNITEDHEALTH GROUP, Minnetonka MN

- Provide Multi Platform Database Support for UHG security application
- Develop training materials for application users
- Identify patterns and trends and determine requirements for newly requested enhancements
- Analyze tools to improve team communications and work flow.

SENIOR DATABASE ADMINISTRATOR

UNITEDHEALTH GROUP, Minnetonka MN

- Coordinated with project management on database development timelines

- Built databases and table structures for web applications
- Developed scripts and processes for data integration and maintenance
- Modified databases to meet needs and goals determined during planning process
- Set up and controlled user access levels across databases to protect important data
- Installed middleware on Windows environments.
- Leveraged CLI tools for efficient system management, automation, and troubleshooting across diverse environments.
- Skilled at working independently and collaboratively in a team environment
- Worked effectively in fast-paced environments.

SENIOR DATABASE ADMINISTRATOR

SEARCH AMERICA, Maple Grove MN

- Developed and updated databases to handle customer data
- Developed scripts and processes for data integration and maintenance
- Built databases and table structures for web applications
- Utilized RDBMS tools and utilities to monitor, tune and optimize system performance
- Worked with staff to develop and implement procedures to prevent data loss and maximize system availability
- Created and updated database designs and data models.
- Leveraged CLI tools for efficient system management, automation, and troubleshooting across diverse environments.

SENIOR DATABASE ADMINISTRATOR

SHPS, Plymouth MN

- Coordinated with project management on database development timelines
- Built databases and table structures for web applications
- Conducted tests to identify issues and make necessary modifications
- Modified databases to meet needs and goals determined during planning process
- Developed scripts and processes for data integration and maintenance
- Set up and controlled user access levels across databases to protect important data
- Worked flexible hours across night, weekend and holiday shifts
- Identified issues, analyzed information and provided solutions to problems
- Created and updated database designs and data models.
- worked with CLI to create automation, maintain database systems and troubleshoot technical issues..

Education

**Bachelor of Arts: Secondary Education Mathematics,
Elementary Education**

Training

- Cloud Computing - University of Texas, This is a Cloud computing course that incorporates AWS, Azure, and GCP. Course curriculum covered topics such EC2, VMs, Load Balancers, Storage(EBS, EFS, S3, Blob, Databases), Lambda functions, Containers, and Docker.
- Full Stack Development bootcamp - University of MN, This was a full stack developers course that focused on web development both front end a backend. Topics were javascript, html/css, Front-end Frameworks, Responsive Design(Bootstrap, Tailwind, React), Databases(mysql, mongodb), Version Control(Git, Github, Gitlab), APIs, and Testing(Unit and Integration)
- Administering Microsoft SQL Server 2022 - Koenig step forward, This was a 40 hour hands on training on how to administer MS Sql Server databases.
- Unix C and C++ - University of MN, Completed 6 month course.
- Completed online training courses in Data Science with Python programming, Data Engineering, and Postgresql.
- Completed Training through United Health Group for Introduction to Problem Solving and Lean Problem Solving.
- Data Engineering - Purdue University, Currently enrolled 7 month course.

Community Service

- 27 year member of the Minnesota State High School League as a referee for both Football and Basketball.
- 5 years of Coaching baseball.
- Member of the Cokato Dassel Lions Club. The mission is to raise money and provide financial support through volunteer work.
