CHRISTOPHER BORER

PROFESSIONAL SUMMARY

Highly skilled and dedicated technology professional with in-depth industry experience. Trained in multiple scripting languages, including JavaScript, Python, Perl, and Bash. Completed course work in Cloud Computing, AWS, Azure and Google Cloud Platform. Experienced with writing Transact SQL code and writing reports in SSRS. A seasoned Sybase Database Administrator who has worked with Microsoft SQL Server, MySQL and with online training on MongoDB. Possesses working knowledge of Microsoft Operating Systems, Unix and various Linux systems. Proven ability to thrive in Agile environments, with experience using Jira, ServiceNow, and Confluence. A strong ability to understand complex problems and deliver high-quality solutions. Committed to continuously updating skills and knowledge, keeping pace with ever-evolving technology trends by completing courses in full-stack development and cloud computing. An inherent communicator and team player with a proven track record of successfully leading multiple projects to completion.

WORK HISTORY

WIPRO TECHNOLOGIES - LEAD ADMINISTRATOR, South Haven MN

- Responsible for supporting both MS SQL Server and Sybase masking database environments.
- Responsible for masking data of Aurora, MYSQL, MS SQL Server, and Sybase databases.
- Setup Profiling, and Masking jobs in Delphix application to complete masking process.
- Created scripts to modify databases schemas to ensure masking process would run optimally on multiple platforms.
- Created scripts to restore masked databases to original state for application testing on multiple platforms.
- Worked with Jira scrum master to develop epics and stories that streamlined and tracked the workflow.
- Networked with industry professionals to exchange best practice knowledge and stay abreast of latest developments
- Gather and report governance data for managed services group

- Single point of contact and liaison for offshore production support team and Sybase engineers
- Developed automation to maintain database integrity and reduce manual intervention.
- Enhanced team productivity by providing leadership, training, and support to junior administrators.

- Worked with DDI Remediation team to establish requirements for masking of production and non-production data.

UNITEDHEALTH GROUP - IT DATABASE CONSULTANT ENTERPRISE INFORMATION SECURITY, Minnetonka MN

- Provide Multi Platform Database Support for UHG security application
- Develop training materials for application users
- Identify patterns and trends and determine requirements for newly requested enhancements
- Analyze tools to improve team communications and work flow.

UNITEDHEALTH GROUP - SENIOR DATABASE ADMINISTRATOR, Minnetonka MN

- Coordinated with project management on database development timelines
- Built databases and table structures for web applications
- Developed scripts and processes for data integration and maintenance
- Modified databases to meet needs and goals determined during planning process
- Set up and controlled user access levels across databases to protect important data
- Installed middleware on Windows environments
- Skilled at working independently and collaboratively in a team environment
- Worked effectively in fast-paced environments.

SEARCH AMERICA - SENIOR DATABASE ADMINISTRATOR, Maple Grove MN

- Developed and updated databases to handle customer data
- Developed scripts and processes for data integration and maintenance
- Built databases and table structures for web applications
- Utilized RDBMS tools and utilities to monitor, tune and optimize system performance
- Worked with staff to develop and implement procedures to prevent data loss and maximize system availability
- Created and updated database designs and data models.

SHPS - SENIOR DATABASE ADMINISTRATOR, Plymouth MN

- Coordinated with project management on database development timelines
- Built databases and table structures for web applications
- Conducted tests to identify issues and make necessary modifications
- Modified databases to meet needs and goals determined during planning process
- Developed scripts and processes for data integration and maintenance
- Set up and controlled user access levels across databases to protect important data
- Worked flexible hours across night, weekend and holiday shifts
- Identified issues, analyzed information and provided solutions to problems
- Created and updated database designs and data models.

CARGILL, INC - DATABASE ADMINISTRATOR, Minnetonka MN

- Developed scripts and processes for data integration and maintenance
- Administered, supported, and monitored databases by proactively resolving database issues and maintaining servers

- Modified databases to meet needs and goals determined during planning process
- Utilized RDBMS tools and utilities to monitor, tune and optimize system performance
- Created and updated database designs and data models.

DE LA SALLE HIGH SCHOOL - EDUCATOR, Minneapolis, MN

- Design and implement lesson plans by selecting appropriate instructional materials, resources, and technology tools to support student learning.
- Deliver interactive instruction using a variety of teaching methods, strategies, and techniques to engage students in active learning and problem-solving.
- Assessing student progress through a variety methods, such as quizzes, tests, projects, and presentations, combined with providing constructive feedback to students.
- Provide individualized instruction to students who need additional assistance or enrichment. Offering extra help sessions, tutoring, and personalized learning opportunities.
- Collaborating with colleagues, administrators, and parents to support student learning and achievement.
